

Use gmail filters to kill recurring spam

Gmail provides an easy way to filter and permanently delete recurring spam you receive. For repeating emails that you are sure you never want to see in your inbox, this is how to filter them.

Select the offending email (in this case Ziff Davis Events)

From the More box select Filter messages like these

The simplest thing to filter on is the From address, and this is what gmail uses to start. In this case it is "it-reg@enews.zdb2bmail.com"

from:(it-reg@enews.zdb2bmail.com)

Filter ✕

From
it-reg@enews.zdb2bmail.com

To

Subject

Has the words

Doesn't have

Has attachment

Don't include chats

Size **greater than** **MB**

 [Create filter with this search »](#)

Some spam sources will change the address, for example it may use bulletin@enews.zdb2bmail.com as well as it-reg@enews.zdb2bmail.com but usually the domain will stay the same (@enews.zdb2bmail.com). You can use the * wildcard to filter on all messages from that domain.

Filter

From
*@enews.zdb2bmail.com

Once you have the filter set up the way you want, click [Create filter with this search](#). Select [Delete it and Create Filter](#). From now on any messages from this address will bypass your inbox and go straight to the Trash folder.

from:(*@enews.zdb2bmail.com)

[« back to search options](#)

When a message arrives that matches this search:

Skip the Inbox (Archive it)

Mark as read

Star it

Apply the label:

Forward it [add forwarding address](#)

Delete it

Never send it to Spam

Always mark it as important

Never mark it as important

Categorize as:

[Create filter](#)

Also apply filter to 7 matching messages.
